

Pressure relief valve (Pilot control valve)

RE 25724/03.10
Replaces: 01.05

1/8

Type (Z)DBT/DZT

Size 6
Component series 1X
Maximum operating pressure 315 bar
Maximum flow 3 l/min

TB 0240

Type ZDBT

Table of contents

Contents	Page
Features	1
Ordering code, symbols	2
Function, section	3
Technical data	4
Characteristic curve	4
Unit dimensions	5 to 7
Examples of application	8

Features

- Directly operated valve for the limitation of the system pressure
- Application as pilot control valve
- For plate and control panel mounting

Function, section

Type DBT pressure relief valves are seat design remote control valves and allow for the limitation of the system pressure. The valve is adjusted manually by the adjusting device (4). The valves basically consist of housing (1), valve poppet (2) and corresponding valve seat (3). In unloaded position, the valve poppet (2) applies pressure to the valve seat (3) locking the connection between P and T port.

If the hydraulic force equals the force set at the adjusting element (4), the valve controls the set pressure. As the valve poppet (2) lifts off the valve seat (3), the excess pressure fluid can flow off from P to T.

If the spring (5) is completely without load, a minimal pressure of 3 bar (spring pretensioning force) is reached.

These valves are basically used as pilot control valves for the indirect control of major flow.

Type DBT-XP2-1X

Technical data

general

Installation position		Any
Storage temperature range	°C	–20...+80
Ambient temperature range	°C	–20...+70
Weight	kg	2.0

hydraulic (measured with HLP 46; $\vartheta_{oil} = 40\text{ °C} \pm 5\text{ °C}$, $\nu = 35\text{ mm}^2/\text{s}$)

Maximum operating pressure	– Port P	bar	350
Maximum set pressure	– Pressure rating 60 bar	bar	60 (only possible for type DZT)
	– Pressure rating 160 bar	bar	160
	– Pressure rating 315 bar	bar	315
	– Pressure rating 350 bar	bar	350
Minimal set pressure		bar	3
Return flow	– Port T	bar	Separately depressurized to the tank
Maximum flow		l/min	3
Hydraulic fluid			Mineral oil (HL, HLP) according to DIN 51524 Other hydraulic fluids upon request!
Hydraulic fluid temperature range		°C	–20...+80
Viscosity range		mm ² /s	15...380
Max admissible degree of contamination of the hydraulic fluid - cleanliness class according to ISO 4406 (c)			Class 20/18/15 ¹⁾
Hysteresis		%	< 5 of the max. set pressure
Control oil volume (V_x) (only pressure on/off valves)		cm ³	< 0,5

¹⁾ The cleanliness classes specified for the components must be adhered to in hydraulic systems. Effective filtration prevents faults and at the same time increases the service life of the components.

For the selection of filters, see data sheets 50070, 50076, 50081, 50086, 50087 and 50088.

Characteristic curve (measured with HLP 46; $\vartheta_{oil} = 40\text{ °C} \pm 5\text{ °C}$, $\nu = 35\text{ mm}^2/\text{s}$)

Unit dimensions (dimensions in mm)

Type DBT-G1-1X/...

- 1 Hand wheel
- 2 Rotary knob
- 3 Valve mounting bores
- 4 Pressure gauge connection
- 5 Lock nut

Valve mounting screws (separate order)

4 M6 hexagon socket head cap screws

Screw length as required
